

TOXIC SLUDGE

There are many **legends** about how zombies are created. Some tales tell of humans that have been turned into zombies after being **exposed** to a **toxin** or **virus**. Serve up this gooey green sludge in honor of how your guest may have become one of the undead.

Makes 10 servings

Ingredients

- ★ Water with green food coloring
- ★ Assorted gummy candies
- ★ 1 qt. (0.95 L) of lime sherbet
- ★ 2.1-qt. (2-L) lemon-lime soda

Equipment

- ★ An ice cube tray
- ★ A large punch bowl
- ★ An ice cream scoop
- ★ A spoon
- ★ A ladle
- ★ Serving glasses
- ★ Reusable straws

Allergy Alert!

Making the metal aluminum can create a red sludge that can kill wildlife and cause burns to humans.

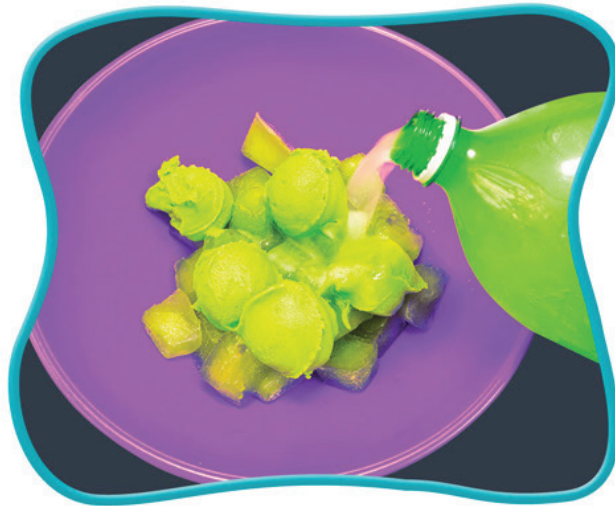

- 1 Fill an ice cube tray with water that has been colored with a few drops of green food coloring.
- 2 Carefully place the ice cube tray in the freezer for about 3 hours, and allow it to freeze completely.
- 3 Remove the ice cube tray from the freezer. Turn it upside down over a clean, flat surface and twist the tray to release the green ice cubes.
- 4 Put the green ice cubes into the punch bowl.
- 5 Select a variety of creepy gummy candies to add as a **garnish**.

6 Using an ice cream scoop, add about half the sherbet to the punch bowl.

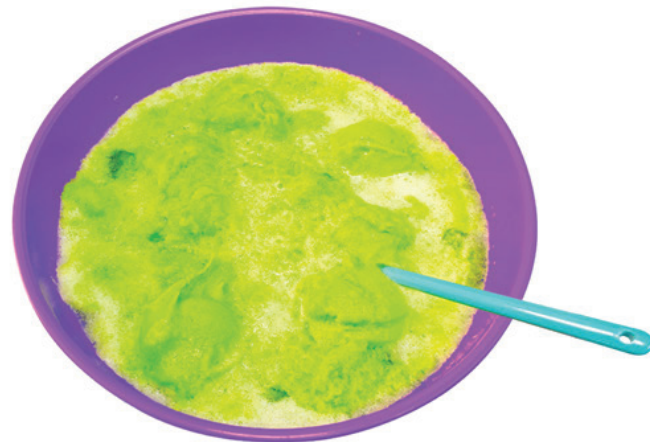

7 Carefully pour the lemon-lime soda over the ice cubes and sherbet.

8 Gently stir with a spoon to mix the contents.

9 Next, add the rest of the sherbet on top and stir again.

10 Add the gummy candies as a garnish.

11 To serve, ladle scoops of the sludge into your guest's glass. Top with more gummy candies and add a straw to slurp up the toxic drink!
